

Dear Friends,

During these very challenging times, To Life! is thinking of all the people we serve. Breast cancer is traumatic to deal with, even in the best of times. We want you to be safe and to take good care, especially now as we face a global health crisis, making it that much more difficult to navigate. Our goal is to ensure that our friends, many medically vulnerable, are safe and avoid exposure to any illness and to make sure that you know you can reach us for support and assistance. While our Delmar and Saratoga boutiques and offices are temporarily closed, we are still hard at work on your behalf. Our staff is working remotely and we are busily rethinking our programs and services to offer as many virtual options as possible.

- Our support groups have already begun virtual meetings.
- We are moving toward online platforms for all our programs through the end of April 2020, or longer.
- Our annual fundraising event, A Toast for To Life!, will not continue in-person as planned on May 5, 2020. We are exploring alternative options to gather together safely online while retaining our plans to honor our award recipients, toast our community, and raise vital funds necessary to support our mission and serve this community. Please stay tuned as details are available.

To Life! has always been a community, and we will need to rely on our community for support as we work through these times. While we would rather not have to ask for financial support, those we serve need us and we remain committed to providing all the support and education they need. COVID-19 may have required much of our lives to be put on pause, but breast cancer marches on and the people dealing with such a diagnosis need our support now more than ever before.

While the boutiques are closed, we anticipate re-opening just as soon as it is appropriate to do so. In the meantime, our fitters and other staff will work with you to schedule fittings or answer your questions. We do have the capability to mail products to clients.

Please feel free to reach out to any of our staff by email or phone and we will do everything that we can to accommodate your needs. Office phone 518-439-5975.

We may look a little different for a while, but we're still here for you. We will be closely monitoring the situation as time progresses and will begin restoring in-person meetings when it's medically safe and appropriate for you - the great community we serve.

With best regards for staying safe,
Mara and Eileen
